Application Showcase

Premium Machining Samples

Standard Model: Built-in Control Cabinet Version

Price: $1,700

Core Configuration

Integrated built-in control cabinet for higher integration and easier operation.

Product Features

Compact body saves space, with stable performance to meet basic engraving needs.

Upgraded Model: External Control Cabinet Version

钰雕机械
YUDREAMS

Price: $1900

Core Configuration Upgrades

- Independent external control cabinet optimizes the machine layout.
- Professional handheld pendant for more flexible operation.

Product Advantages

- Flexible and convenient operation with movable control around the machine.
- Optimized human-machine interaction to boost work efficiency.

Core Information Comparison of the Two Models

标准型（Standard）$1700

- Core Configuration: Integrated built-in control cabinet
- Key Differences: Compact structure, space-saving, cost-effective choice

升级版（Upgrade）$1900

- Core Configuration: Independent external control cabinet + DSP handheld control pendant
- Key Differences: Flexible and convenient operation, better HMI experience, higher efficiency

Core Differences at a Glance

标准型（Standard）

Price: $1700

Control Cabinet: Integrated built-in design

Operation Mode: Fixed-position operation

Space Occupation: Compact structure, small footprint

Key Advantages: Cost-effective, excellent space-saving

升级型（Upgrade）

Price: $1900

Control Cabinet: Independent external design

Operation Mode: DSP handheld pendant + control cabinet

Space Occupation: Slightly larger, requires separate placement for the control cabinet

Key Advantages: Easier operation, higher efficiency, better user experience

Detailed Technical Specifications (Part 1)

Worktable Specification

1300 × 2500 × 200 MM

Table Material

PVC + high-strength aluminum profile

Bed Structure

Integral steel pipe welding, stable and durable

Control System

Yodreams professional control system

System Positioning Accuracy

±0.01 mm(high-precision control)

Max Processing Speed

1-20 m/min (safe idle speed)

Drive Motor

YD450B OR CW860

Spindle Motor

3.2KW water-cooled spindle (or 3.5KW air-cooled spindle)

Detailed Technical Specifications (Part 2)

Guide Rail & Transmission

YD20 high-precision guide rails ensure smooth operation.

Driver

YD860 OR CW860

Frequency Converter

Best 4.0kW (high efficiency and energy saving)

Working Voltage

AC 380V/220V (standard mains input)

Compatible Tool Specifications

3.175 / 4 / 5 / 6 / 8 / 12.7 mm

Standard Accessories List

Data cable, tool setting tool, pressure plate, power cord, control card, etc.

Outstanding Processing Capabilities • Sample Showcase

Comprehensive Materials & Wide Scenarios

Solid wood, MDF, acrylic, PVC, aluminum-plastic boards, covering mainstream processing.

Diverse Craftsmanship & High Precision

Carving, cutting, relief, hollowing (partitions, screens), millimeter precision, smooth burr-free edges.

Exquisite Craftsmanship & Wide Adaptability

Deep/shallow reliefs, used in furniture, cabinet customization, and decoration for diverse production.

Summary & Selection Guide

Standard Model (Built-in Control Cabinet)

$1700

Ideal for users with a limited budget who prioritize cost-effectiveness. The built-in design saves valuable workspace, making it perfect for compact environments.

Bulk purchase (2+ units): $1650 per unit

Upgraded Model (External Control Cabinet)

$1900

Ideal for users who value operational convenience and efficiency. An extra $200 investment delivers a superior human-machine interaction experience, offering significant long-term production value.

Performance Comparison

Both models deliver consistent, stable and precise machining. The standard version is compact and space- saving, while the upgraded one offers more flexible operation and better interaction. Either choice ensures reliable performance to meet your production needs.
